INDONESIA'S ECONOMIC RESILIENCE IN TIMES OF CURRENCY VOLATILITY

The Indonesian rupiah recently came under significant pressure, approaching IDR 18,200 against the US dollar, while the Jakarta Composite Index (IHSG) declined sharply. Foreign investors recorded substantial outflows, although subsequent measures by Bank Indonesia and supportive government policies helped improve market sentiment and stabilize the currency.

Market uncertainty was further heightened by false rumors that Indonesia had been downgraded by MSCI from Emerging Market to Frontier Market status. Although quickly disproven, the episode demonstrated how sensitive markets can be to confidence and perception.

Two contrasting narratives have since emerged. One suggests Indonesia is heading toward a crisis similar to 1998, while the other attributes the rupiah's weakness entirely to external factors such as a stronger US dollar, geopolitical tensions, and higher global interest rates. The reality is likely more nuanced. Open discussion of both domestic and global challenges is essential to maintaining trust and addressing concerns effectively.

The rupiah's depreciation is not limited to the US dollar, reflecting broader market sentiment. In emerging economies, confidence is a valuable asset. When confidence weakens, currencies, stock markets, and investment flows often react quickly.

For businesses, a weaker rupiah presents both challenges and opportunities. Companies that rely heavily on imported materials, such as those in the automotive, chemical, pharmaceutical, and medical device sectors, may face higher costs. Conversely, export-oriented industries and tourism can benefit from improved international competitiveness and increased attractiveness to foreign visitors.

Despite current headwinds, we remain confident that Indonesia's economy will continue to demonstrate resilience. As Southeast Asia's largest market, Indonesia remains an important destination for Swiss companies and long-term investment.

GE VERNOVA

In Indonesia, GE Vernova has been a committed partner for over 70 years. With a local team of ~600 employees across three locations, we contribute up to 30% of the country's power needs.

GE Vernova Inc. (NYSE: GEV) is a purpose-built global energy company that includes Power, Electrification, and Wind segments and is supported by its accelerator businesses. Building on over 130 years of experience tackling the world's challenges, GE Vernova is uniquely positioned to help lead the energy transition by continuing to electrify the world while simultaneously working to decarbonize it.

Clariant Brings Nature-Powered Performance with GlucoPure™ Sense and Velsan™ Flex to Indonesia

The concept of caring for your clothes, skin, and home with ingredients derived from nature itself is no longer a distant vision. Clariant, a leading Swiss specialty chemicals company, is making this a reality. Two of its most remarkable green innovations, GlucoPure™ Sense and Velsan™ Flex, are now proudly manufactured in Tangerang, Indonesia — as part of Clariant's commitment to supporting evolving Halal and sustainability requirements across Asian markets.

GlucoPure™ Sense — Versatile Nature-Powered Performance

GlucoPure™ Sense is a truly versatile, 96% bio-based ingredient derived entirely from sunflower oil and natural sugars. In home care, it delivers powerful yet gentle cleaning in hand dishwashing liquids — free from irritant warning labels, tough on grease, yet leaving hands soft and moisturized after every wash. In fabric care, it provides excellent secondary fabric care for great sensory effects and less ironing stress that keep clothes looking new for longer. From dish soap to fabric care, GlucoPure™ Sense proves that outstanding performance and environmental responsibility go hand in hand.

Velsan™ Flex — Preservation Reimagined, Naturally

Every cosmetic product requires effective preservation to ensure safety and longevity. Velsan™ Flex redefines how that is achieved. Sourced from natural plant-based raw materials, it enhances existing preservation systems so effectively that up to half of the conventional preservatives in a formulation can be eliminated — resulting in cleaner, milder, and more conscientious products for today's discerning consumers.

By establishing local production in Indonesia, Clariant reaffirms its commitment to delivering world-class, planet-friendly innovation directly to Asia.

ENDRESS+HAUSER INDONESIA CONTINUES TO DRIVE THE IMPACTFUL INDUSTRY- EDUCATION COLLABORATIONS

With the commitment to advancing Indonesia's industrial ecosystem, Endress+Hauser Indonesia wrapped up a series of initiatives focused on innovation, knowledge exchange, and talent development. A key milestone was the Forum on Dual Vocational Partnership, "From Potential to Impact: Co-creating Talent through Dual Vocational Partnerships," which brought together industry leaders, and educational institutions to strengthen industry-academia collaboration. The scholarship awards to partner institutions reinforce E+H's support for developing future-ready talent. This commitment was further strengthened through visits to leading educational institutions and industry stakeholders, including ITB, POLMAN, ATMI Cikarang, Swiss German University, and FESTO Indonesia.

On the industry front, 11 E+H Indonesia customers participated in the Endress+Hauser Global Forum 2026 in Basel, Switzerland, alongside more than 1,050 international participants to exchange insights on sustainability, digitalization, and the future of the process industry. E+H Indonesia also hosted Food & Beverage, and Across Industries seminars in Cikarang and Surabaya, providing customers with practical insights into inline quality monitoring, process optimization, and the latest innovations in products and solutions. In addition, E+H Indonesia participated in PINDEX – Infrastructure: Downstream Expo 2026, engaging with industry stakeholders on topics such as measurement reliability, safety, and digital transformation.

Successfully Supporting the Collection of 244 Tons of Waste, Nestlé Indonesia Expands Its Nestlé Waste Station Network to Alfamart to Strengthen the Circular Economy

Nestlé Indonesia expanded its Waste Station initiative to Alfamart, increasing accessibility for communities to recycle through daily retail touchpoints. Previously, the initiative collected over 244 tons of waste and engaged 14,000+ users since 2023, demonstrating scalable impact in driving waste-wise behavior and circular economy practice.

Nestlé Indonesia Cleans Up Sumberjaya Beach - A Step Toward a Broader Coastal Environmental Movement

Nestlé Coastal Warrior engaged multiple local environmental communities and 50 volunteers to clean 350 meters of coastline, collecting 250 kg of waste. Through hands-on clean-up, sorting, and education, the initiative reduces marine debris while building awareness and fostering lasting sustainable behavior change.

Encouraging Active Lifestyles and Fish Consumption, Regal Springs Indonesia Supports “Fish for Fit” with the Ministry of Maritime Affairs and Fisheries

Regal Springs Indonesia supports the government's Movement to Promote Fish Eating (Gemarikan), encouraging greater fish consumption as a source of high-quality protein for the Indonesian community.

As part of the hybrid race-based fitness event, Regal Springs Indonesia highlighted the nutritional benefits of tilapia, emphasizing its role in supporting muscle recovery, immunity, and overall well-being. The initiative also featured educational activities and fishery product promotions, reinforcing the importance of balanced nutrition and regular exercise while strengthening collaboration between the public and private sectors to advance Indonesia's food security and nutrition goals.

Public Lecture on Leadership in the Aquaculture Industry with Universitas Sumatera Utara (USU)

In collaboration with the Faculty of Agriculture at the University of North Sumatra (USU), Regal

Springs Indonesia hosted a public lecture, "Next Wave Leaders: Mastering Aquaculture & Industry Skills" (22/04) as part of their Memorandum of Agreement (MoA) signed in 2024.

Brought together students from various disciplines to explore the future of Indonesia's aquaculture sector and strengthen collaboration between industry and academia, Rudolf Hoeffelman, Regal Springs Indonesia President Director, highlighted the importance of sustainable aquaculture, responsible resource management, and leadership in navigating industry challenges and global market dynamics. The partnership encompasses knowledge-sharing initiatives, joint research, internships, mentoring programs, and public lectures, all aimed at developing future aquaculture professionals and enhancing the global competitiveness of Indonesia's fisheries sector.

SYNGENTA INDONESIA ADVANCES SAFETY, INNOVATION, AND SUSTAINABLE AGRICULTURE

Syngenta Indonesia continues to reinforce its commitment to safety, innovation, and the advancement of Indonesian agriculture through a range of initiatives that support both employees and farmers. As part of its strong safety culture, Syngenta Indonesia marked Driving Safety Focus Month with campaigns promoting responsible driving habits under the theme “Focus on Protection — Click It or Ticket.” Employees were encouraged to prioritize road safety by staying focused, avoiding distractions, respecting speed limits, and managing fatigue.

In support of agricultural development, Syngenta Indonesia successfully hosted the Retailer Conference 2026 in Labuan Bajo, bringing together business partners to celebrate achievements, strengthen collaboration, and reaffirm a shared commitment to Petani MAJU, Indonesia Maju.

Further strengthening its support for farmers, Syngenta Indonesia also introduced SIDIO (Syngenta Indonesia Biological), a new portfolio of biological solutions designed to improve productivity, maintain soil and crop health, and promote more sustainable farming practices. Through innovative solutions, technical support, and close collaboration with stakeholders, Syngenta Indonesia continues to help farmers achieve better, more consistent, and more profitable outcomes while contributing to the future of Indonesian agriculture.

INTime Elevates the Luxury Watch Experience with Newly Revamped Boutique at Grand Indonesia

Jakarta, 4 March 2026 – INTime, the premier luxury watch retail destination under Time International, proudly unveils its newly redesigned boutique at Grand Indonesia. Spanning nearly 140 square meters, the transformed space introduces a refined retail concept that seamlessly blends contemporary elegance with modern sophistication.

Designed to immerse guests in a sophisticated and welcoming atmosphere, the boutique showcases a harmonious interplay of luxurious marble textures, sleek stainless steel finishes, and modern architectural details. Every element has been thoughtfully curated to create an elevated environment where customers can explore exceptional timepieces in comfort and style.

At the heart of the boutique is a curated portfolio of internationally renowned watch brands, including Baume & Mercier, Bell & Ross, Breitling, Longines, TAG Heuer, and Tudor, each celebrated for its heritage, innovation, and precision. [Read more](#)

Elevating the Employee Experience: Time International Celebrates Three Years as One of the “Best Companies to Work For in Asia”

HILTI INDONESIA CONTINUOUS EFFORT IN DRIVING INNOVATION AND COLLABORATION IN MAKING CONSTRUCTION BETTER

Hilti was proud to participate in MetConnex 2026, held at the Jakarta Convention Center (JICC) on 12–13 May 2026. The event brought together key stakeholders from across the mining, metallurgy, and industrial ecosystem, serving as a vital platform for knowledge exchange, innovation, and strategic collaboration.

In line with its long-term vision, Hilti places strong emphasis on innovation and sustainability, delivering solutions that enhance productivity, safety, and environmental responsibility. By collaborating with industry partners, customers, and stakeholders, Hilti aims to play a meaningful role in shaping a more advanced and sustainable mining ecosystem in Indonesia.

Participation in MetConnex 2026 reflects Hilti's ongoing dedication to empowering industries through cutting-edge technologies, reliable services, and forward-thinking solutions, while supporting Indonesia's journey toward a more competitive and future-ready industrial landscape. The collaboration continues with Hilti Indonesia participation in a strategic seminar hosted by the Jakarta Department of Human Settlements, Land, and Spatial Planning (DCKTRP). The event served as an important platform to explore how fire safety regulations can be effectively translated into real-world implementation across the construction industry.

Hilti Indonesia C&A Manager - Dana Lutfi Ilmansyah presented the critical role of compartmentation in passive fire protection systems. He highlighted that maintaining fire barriers through properly installed firestop systems at every opening and penetration is essential to prevent fire and smoke spread. Equally important, he noted, is ensuring that installation and inspection are carried out in accordance with established standards, as these directly determine the overall performance and reliability of the system.

Hilti Indonesia remains committed to supporting the industry in strengthening fire safety standards and implementation, delivering solutions that enhance building safety, compliance, and long-term resilience. Through collaboration with regulators, partners, and industry stakeholders, Hilti continues to contribute to a safer and more sustainable built environment.

As part of its ongoing commitment to sustainability and community development, MSC Indonesia successfully conducted a Corporate Social Responsibility (CSR) initiative on 7 June 2026, supporting children's mobility and access to education in rural Bali.

The initiative brought together MSC Indonesia employees in a volunteer activity to assemble 15 bicycles, which were subsequently donated through Angel Heart Foundation. The foundation plays a vital role in supporting underserved communities in Buleleng, Bali, helping improve access to educational opportunities and essential daily services.

By enhancing mobility for children in rural areas, the initiative aims to address practical barriers to education while fostering greater independence and opportunity. The bicycle donation reflects MSC's belief that meaningful progress begins with access: access to education, opportunity, and a brighter future.

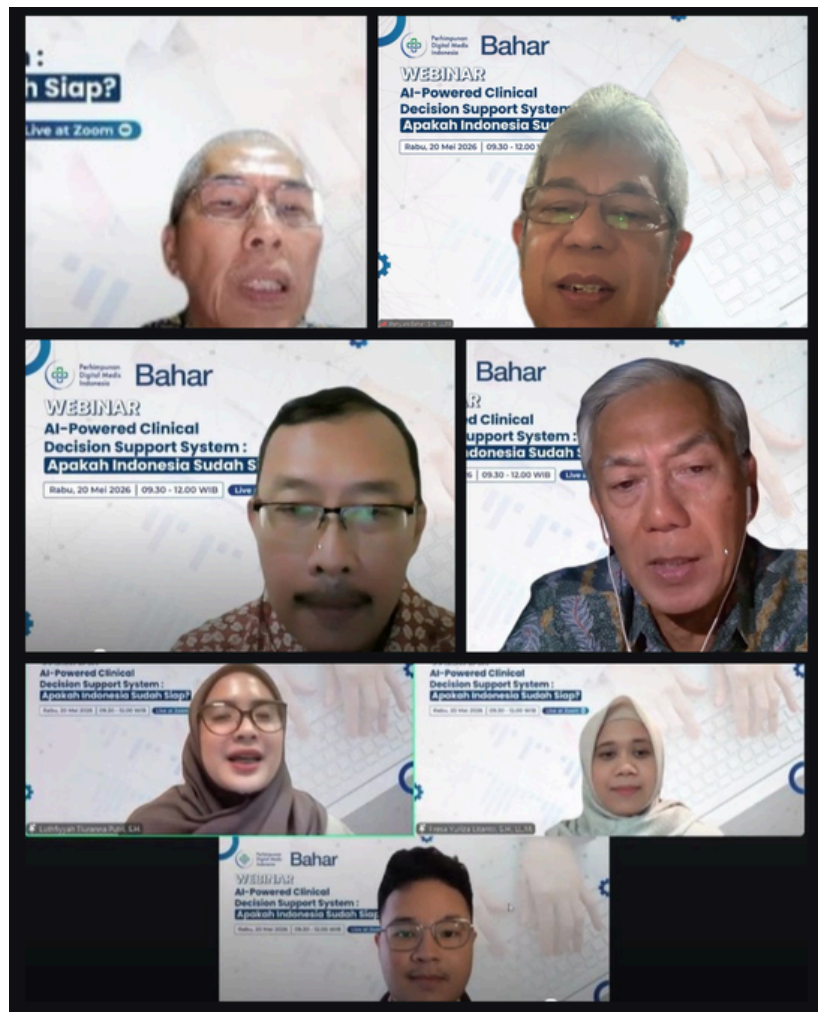

At MSC, sustainability extends beyond environmental stewardship to include creating positive social impact and contributing to the resilience of local communities. Through initiatives such as this, MSC seeks to generate lasting value in the communities where it operates, supporting inclusive development and empowering future generations.

This initiative underscores MSC Indonesia's dedication to responsible corporate citizenship and its commitment to moving the world together, not only through global trade and connectivity, but also through meaningful community engagement and social contribution.

Bahar and Association of Health Management Physicians (PDMI) Explore Indonesia's Readiness for AI-Powered Healthcare

Healthcare Artificial Intelligence is rapidly reshaping healthcare worldwide, offering new opportunities to improve patient care and support medical professionals. In Indonesia, where challenges such as the uneven distribution of specialist doctors and healthcare workforce shortages persist, AI powered tools could play an important role in strengthening healthcare delivery.

To explore these opportunities and the challenges that come with them, Bahar Law and Consulting (Bahar) partnered with the Indonesian Association of Health Management Physicians (PDMI) to host a webinar titled "AI-Powered Clinical Decision Support System: Is Indonesia Ready?" on 20 May 2026. The discussion brought together experts from the legal, healthcare, and technology sectors to examine Indonesia's readiness for AI adoption.

Three key themes emerged from the discussion. First, healthcare institutions should begin with targeted pilot programs that allow organisations to test AI solutions, identify challenges, and build confidence before scaling implementation. Second, strong governance frameworks are essential to ensure data accuracy, cybersecurity, patient privacy, and clinical safety. Finally, while AI-specific regulations are still evolving, organisations can move forward responsibly by adopting recognised international standards and best practices.

The webinar underscored that successful AI adoption requires collaboration across disciplines. By bringing together healthcare practitioners, legal experts, and technology specialists, the discussion highlighted a shared goal: ensuring AI is implemented in a way that is safe, practical, and beneficial for both healthcare professionals and patients across Indonesia.

RÖDL INDONESIA FORUM 2026

RÖDL Indonesia held a successful Indonesia Strategy Forum that shared practical insights to help companies navigate Indonesia's evolving business landscape (04/06).

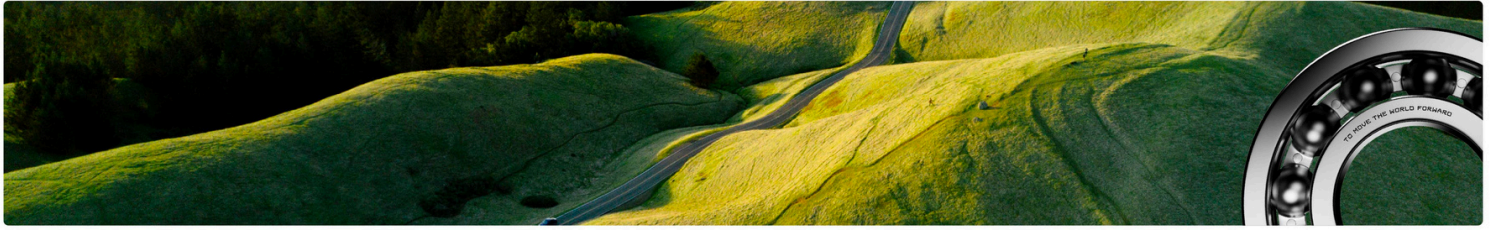

The program concluded with interactive panel discussions featuring experts from RÖDL and industry leaders, providing diverse perspectives and practical takeaways for navigating Indonesia's evolving market environment. [Read more](#)

Global Minimum Tax (Pillar Two): What Multinational Groups Need to Prepare in 2026

RÖDL Indonesia's recent Business Breakfast brought together business leaders and tax professionals to discuss the latest developments surrounding Indonesia's implementation of Global Minimum Tax (Pillar Two).

The session provided practical insights into recent administrative guidance and emerging compliance requirements for multinational enterprises by Johanes Glorinus Saragih, International Tax Analyst at the Tax Office, and Samuel Reinaldo, Transfer Pricing & International Tax Manager of RÖDL Indonesia, helping companies to navigate the evolving global tax landscape. During the session, participants unpacked the complexities of the new framework, covering key compliance requirements and tax considerations.

APL Advances Green Energy Transition with Rooftop Solar Power Plant Inauguration in East Java

Commemorating the World Environment Day earlier this month, APL officially inaugurated a rooftop solar power plant at its East Java facility in Sidoarjo. Developed in partnership with HIJAU, the installation reflects APL's continued efforts to integrate sustainable innovation into its operations and accelerate the adoption of cleaner energy solutions across its network.

With an installed capacity of 202.2 kWp, the system is expected to generate approximately 292,237 kWh of renewable electricity annually. It is also projected to reduce carbon emissions by around 264 tCO₂e per year, equivalent to planting approximately 1,056 trees annually.

As highlighted by Christophe Piganiol, President Director, APL, "This initiative reflects our long-term commitment to building a more sustainable healthcare ecosystem while supporting Indonesia's renewable energy targets." [Read More](#)

Protecting Brands, Upholding Integrity: Successful Counterfeit Goods Raid in Banyuwangi

Integrity Indonesia, through its Brand Protection services, successfully supported a raid operation by Banyuwangi Customs in East Java in April 2026. The operation uncovered counterfeit alcoholic beverages and illegal production equipment.

JANZZ.technology

A New Indonesian Team, Ready to Transform the Labor Market

This quarter, JANZZ.technology has expanded its presence across Indonesia, with a new office in Jakarta's Equity Tower and a round of hires now complete.

Committed to hiring local talent and promoting equal opportunities, these new employees are based in various areas across the country, including Sumatera, Central and East Java, and Bali. Talents range from computational science to linguistics, equipping the Indonesian business operations with the expertise JANZZ's ambitions demand.

With the team now ready, JANZZ.technology are on a mission to transform the Indonesian labor market, leveraging a category-defining occupational intelligence to empower the market at every level. Spanning government bodies, educational facilities, students, businesses, and job seekers, everyone can benefit from JANZZ.technology - with insights that can help reshape policy and modernize curricula, and platforms that connect the right talent with the right opportunities.

For Q3 and beyond, the JANZZ Indonesia team will be focusing their efforts on advancing the workforce intelligence across Indonesia's labor market, putting supply back in sync with demand, and creating a stronger, more agile workforce that benefits everyone.

Swiss–Indonesian Cooperation in Action: Innovation, Skills, and People-to-People Connections

As Switzerland and Indonesia mark 75 years of diplomatic relations, recent Embassy engagements highlighted how the partnership continues to create practical value across sectors, from sustainable industries to skills development and professional networks.

Meeting with H.E. Sakti Wahyu Trenggono, Minister of Marine Affairs and Fisheries, to discuss Swiss–Indonesian cooperation in strengthening quality standards, innovation, and sustainability in Indonesia's marine and fisheries sector.

On 26 May 2026, Swiss Ambassador Olivier Zehnder and the Embassy team met with Indonesia's Minister of Marine Affairs and Fisheries, H.E. Sakti Wahyu Trenggono, to discuss the ongoing cooperation in the marine and fisheries sector. The exchange focused on strengthening quality standards and competitiveness for key Indonesian commodities such as seaweed, shrimp, and milkfish. The meeting also explored how Swiss technology and expertise, including precision technology and cybersecurity, could support Indonesia's fisheries industry by strengthening supply chains, improving traceability, and enhancing sustainability.

Swiss alumni gathering at the Swiss Residence in Jakarta bringing together graduates of Swiss universities and institutions who continue to contribute across sectors in Indonesia.

The Embassy recently hosted a gathering of the Swiss alumni community at the Swiss Residence in Jakarta, bringing together graduates of Swiss institutions active across various sectors in Indonesia. Speakers included Bapak Agung Wicaksono, Director of Transformation and Business Sustainability at Pertamina, who shared how the Swiss Government Excellence Scholarship and his time at the University of St. Gallen shaped his professional path. Ibu Dr. Derry Wijaya, Associate Professor of Data Science at Monash University Indonesia, also shared how her experience at the University of Geneva's AI Lab and Google's Zurich office influenced her journey in artificial intelligence and natural language processing.

Visit to BPVP Banda Aceh, where the Swiss-supported Renewable Energy Skills Development Project helps equip trainees with practical skills for Indonesia's growing renewable energy sector.

Switzerland's commitment to sustainable growth is also reflected in the Renewable Energy Skills Development project. During a visit to BPVP Banda Aceh on 26 April 2026, Violette Ruppanner, Head of Economic Cooperation and Development at the Embassy of Switzerland in Indonesia, observed how Swiss-supported training facilities are helping prepare Indonesia's workforce for the energy transition. At BPVP Banda Aceh, Solar PV and Micro-Hydro Power laboratories, developed with Swiss Government support, provide trainees with practical experience in the renewable energy sector. Since the project began in 2022, BPVP Banda Aceh has produced 91 graduates now working in the solar PV industry or as entrepreneurs.

For the Swiss business community in Indonesia, these engagements reflect the many ways in which Swiss–Indonesian cooperation continues to support innovation, talent development, sustainability, and cross-sector partnerships.

Export Finance Forum in Jakarta

Beyond the plenary sessions, the Export Finance Forum in Jakarta, which took place on 18 June, showcased a broad range of innovative financing solutions designed to support and accelerate import and investment activities in Indonesia by three leading Export Credit Agencies (ECAs) — SERV Swiss Export Risk Insurance (Switzerland), Atradius Dutch State Business (the Netherlands), and Euler Hermes (Germany).

The forum not only provided valuable insights into how ECA-backed financing helps businesses manage risks, access competitive funding, and unlock opportunities for growth and expansion, but also engaged participants, including SwissCham

Indonesia members engaged in interactive and hands-on workshops, creating a unique platform to discuss financing challenges and explore practical industry-specific use cases tailored to their business ambitions.

The event was officially opened by Stefan Schmidt and Rainier Haryanto of the Indonesian Chamber of Commerce and Industry's Switzerland–Indonesia Bilateral Committee, highlighting the importance of strengthening international collaboration and facilitating sustainable investment. [Read more](#)
